EXPERIENCE

Front End Developer — yumma
October 2017 - Present

- Won 1st place at Startup Weekend Boston with a prototype demonstrating key user interactions based on market and user research

Lead Designer — Our Voice
Dec 2016 - June 2017

- Created and maintained brand identity for the organization through all circulated materials both in print and web, including logos, style-guides, flyers, and business cards.

UI / UX Designer — Freelance
Aug 2015 - June 2017

- UX / UI — Focused on core usability by meaningfully (re)shaping key user flows and site architectures. Produced high-fidelity mock-ups with Sketch. Prototyped using InVision and PolymerJS.
- Graphic — Developed brand identities and collateral for print and web, including style-guides, and logos

Photographer — Audrius Krulis LLC
Dec 2016 - June 2017

- Photographed all works for print and web; featured in industry publications and international shows

Research Assistant — MBMC, VT
Dec 2016 - June 2017

- Worked with leading psychologists on anxiety disorder research
- Ran adjunct study testing correlation of results to biochemical markers, with institutional funding and IRB approval

PROJECTS

MARKABLE.ai — IN PROGRESS

Client-facing admin dashboard for fashion + tech + ai startup

- Built with ReactJS + redux with a focus on modular, maintainable components, following strict code and design guidelines

PLETHEM — DEMO

Scientific data modeling application for chemical exposure analysis

- Built using ReactJS + redux, Ant Design UI Framework, and Victory Charts
- Uses OCPU Ajax calls to integrate with R Studio statistical modeling software

Bentö — LIVE • REPO

A full-stack web-app using ReactJS and Rails

- Built using ReactJS and vanilla JavaScript for UI animations and functionality.
- Optimized page load by automatically resizing images when storing AWS S3.
- Modern SCSS that emulates the UI and subtle styles decisions of Behance.

mimic — LIVE • REPO

Javascript game using a facial recognition SDK

- Built with ES6 styled Javascript, implementing the Affectiva facial recognition SDK, which detects and analyzes facial expressions in real time
